

Industrial IoT Services

We help you to get your business AI ready

The momentum of industrial transformation is increasing yearly, and the vast potential of the Internet of Things (IoT) is one of key drivers of this acceleration. We help our clients in this transformation by extending their legacy industrial systems through retrofitting or by building new, tailor-made components of the system that will enable them to collect, analyze and convert the IoT data into actionable insights. Our core offering is the delivery of software engineering services and solutions based on IoT technology.

Our IoT services

- Business Consulting
- Full stack of software development services
- Custom end-to-end IoT projects
- Data analytics and management
- Business Intelligence and Visualization
- OT and IT integration

Extended IoT services

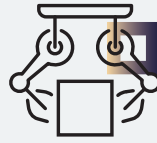

- Predefined / custom dashboard solutions
- Retrofitting and upgrading
- IoT Security
- Intelligent alerting systems
- Predictive maintenance platform

How we get things done

Define Ideas and creativity

We work in close collaboration with our clients, analyzing business processes and defining workflows and necessary integration points. This helps us determine the right IoT journey, with a low risk and zero lock-in.

Build Agility

Using industry-proven, pre-developed building blocks, we rapidly develop and deploy unique solutions. Our QA expertise ensures your IoT is meticulously tested and runs smoothly.

Run Reliability & Maturity

We follow the latest technology trends and use iterative cycles to ensure that solutions are always improving. We have vast SW engineering experience across various industries, in open and closed source environment.

Experience

We use technology proven to work, and our experienced and certified teams have numerous qualifications and support the development of safety-critical and real-time applications.

We have a strong portfolio of experience across a range of industries, including: (Intra)logistics, Smart Energy, Mobility and Travel, Medical, Manufacturing and many more.
